

No Substitute

can really take the place of good pure lard, like that made under federal inspection. MOUNTAIN BRAND Lard is open-kettle rendered, it is made from western hogs, it is absolutely pure.

MOUNTAIN BRAND

Meat Products have become the favorites of the entire west. The demand for this quality of Ham, Bacon, Lard, Sausage and Fresh Meat is increasing constantly. The reason is apparent—the quality is always excellent.

Ogden Packing and Provision Company

LORD BERESFORD HAS THE BLUES

He Sees England Going Straight to Disaster Through Indecision.

London, Oct. 28.—The Times this morning publishes the following:

(By LORD CHARLES BERESFORD.)

(Retired admiral of the British navy, one of the foremost naval authorities in the world and outspoken critic of the Asquith administration.)

War requires quick decisions and prompt action. Both have been lacking since the war commenced. The policy of wait and see is fatal to success in war.

Owing to indecision and vacillation the government on every important occasion has been too late. The ministers, having no initiative of their own, wait for public opinion to drive them. At the same time the ministers withhold from the public information without which they cannot form a just opinion.

We did not stand by our friend Serbia until too late. We neither stand by our friends nor stand up to our enemies. We attempted to bribe Bulgaria by offering her other people's property, thereby copying German methods. We attempted to bribe Greece by offering her a portion of our own property. Needless to say we are humiliated when Greece refuses to accept it.

If we continue our present procedure we shall head straight toward disaster before the latent energy of the nation is awakened. Recriminations and deploring the past are not of much use at the present moment, except in so far as they prevent a recurrence of errors of mismanagement. That mismanagement has been partly the result of amateur strategy and political control of the executive.

Thousands of our best men have been lost ashore and afloat because politicians have assumed the executive function. The war up to now has been controlled by politicians, not by men who have studied and understood war.

The Dardanelles expedition produced the present serious complications in the east and in the Balkans, which involve great danger to ourselves. It opened up the whole eastern question, when all that was required was concentration in the west.

Denounces Dardanelles Fiasco. If we are to win the war certain matters must be settled at once. It is not a question of days, but of hours. We are in a crisis which means life or death to us.

Why are not drastic measures taken to secure all the Germans in our midst, naturalized and unnaturalized? Why do we not at once commandeer all German land, money, securities, etc., throughout the empire?

Why has the defense of London been neglected? It appears to be administered on similar lines to the censorship, with a divided responsibility, nobody knowing who really is responsible.

No Policy, No Objective. Why has not the government taken up the question of the rise in the prices of food and coal in order to prevent exorbitant prices being charged the poor?

At this moment the government has no policy and no objective. The late attorney general left the cabinet because there was no policy, no decision on any point.

We began the war with two great assets—the fleet and our wealth. The second asset is being squandered by millions without business supervision or adequate return. We shall soon be bankrupt if this goes on.

We blundered before the war and have been blundering ever since. What else could happen when the war is being managed by politicians, not by men who understand and have studied war?

We have a cabinet of twenty-one, only one of whom understands anything of war. We can beat the Ger-

mans only by fighting. Talking is useless.

There ought to be six or seven men who understand war to control the war and nothing else, on the same principle as the German general staff. Three men who show they understand the gravity of the position—the minister for war, the minister for munitions and the late attorney general—should be among the number.

A frank, careful statement should be made by the prime minister, surveying the whole war and letting the people know the truth. Everything the enemy knows should be told our own people. We cannot go on as we are doing without shaping straight for disaster.

CONSPIRACY TO BE INVESTIGATED

Boise, Idaho, Oct. 26.—The state board of pardons in special session tomorrow will determine whether or not Walter A. Grant, at one time a prominent citizen of Pocatello, has been made the victim of a conspiracy that railroaded him into the state penitentiary for a period of from twenty-five to fifty years, on a conviction of arson. His mother, Mrs. Dotson of Baltimore, claims to have in her possession a confession from John L. ("Prose") Thomas, exonerating Grant from any wrong doing.

The crime Grant is alleged to have committed was setting fire to the residence of prosecuting attorney Smith of Bannock county at Pocatello, with the intention of burning the house and its inmates. Thomas, colored, was convicted on the same charge. At that time Grant had a pool room and cigar store at Pocatello. His mother claims that he is the victim of spite work on the part of one W. M. Truman.

Thomas was taken ill at the penitentiary and removed to a local hospital for an operation. Fearing he was going to die, Mrs. Dotson says, he sent for Grant and confessed in a signed statement to the conspiracy and Grant's innocence. This confession will be placed before the board tomorrow.

BULL VALLEY GOLD MINES TO RESUME

Salt Lake, Oct. 27.—Preparations have been practically completed for the resumption of work on the Bull Valley Gold Mines property, located twenty-eight miles southeast of Modena, in Washington county, in the camp of Goldstrike, according to R. G. McQuarrie, one of the directors of the company and the superintendent of the property. The work will be started as soon as Mr. McQuarrie returns to the property, which will be in a few days, he said yesterday.

It is the intention of the company to continue the work throughout the winter months, and financial arrangements have been made to that end. The various leads that were so productive on the Hamburg claim will again be picked up and followed, and Supt. McQuarrie said yesterday that he was confident that the company would in the near future be sending gold bullion once more to the local United States assay office. The ore will be milled on the ground.

There is a bright future ahead of the Goldstrike camp, in Mr. McQuarrie's opinion. Daily & Little are sinking a shaft on ground adjoining that of the Primer claim, owned by the Bull Valley Gold Mines company, and a good showing has been encountered recently. Those operators are confident of entering the shipping list in the near future.

R. C. Lund has a lease on the Primer claim and the last word received from the camp was to the effect that the shaft had been sunk to a depth of more than fifty feet and that at that point high-grade gold ore had been struck. It is being sacked for shipment.

G. H. Hays, formerly associated with M. J. Monette in the Hays-Monette Mohawk lease at Goldfield, Nev., and who recently bought the Dora Jane group at Goldstrike, has let a contract to the Bryson brothers. They are to crosscut from the shaft, which is down about sixty-five feet.

ANOTHER SPY PUT TO DEATH

London, Oct. 27, 12:54 p. m.—Official announcement was made today that another spy had been put to death.

The announcement says the prisoner, charged with espionage, was tried recently by the general court-martial, found guilty and sentenced to death. This sentence was confirmed and was carried out this morning.

DISASTER TO THE F-4 SUBMARINE

Evidence That Men on the Boat Fought to Save Themselves.

Washington, Oct. 27.—A graphic story of the battle for life waged in vain 300 feet beneath the surface of the sea by the twenty-one men who perished in the navy's submarine F-4 last March at Honolulu is told in the final report on the loss of the vessel submitted by a board of inquiry headed by Rear Admiral Busch and made public today. Examination of the wrecked hull after it had been brought to the surface and placed in dry dock convinced the board that the disaster was caused by a leak resulting from a corroded battery lining and the failure of the boat through poor diving qualities to respond promptly to the rudder change which should have returned her to the surface.

Discarding the theory once advanced that chlorine gas brought quick relief in death to the crew, the board, from signs within the rusted and battered hull, pieced out in its report a dramatic account of how the doomed men strove desperately to save themselves as their vessel sank to the bottom. Fifteen met death in the engine room where they sought refuge at the last six died at their posts in the flooded forward compartment.

where the French exploded new mine chambers under the German trenches and then dashed to the attack, and east of Rheims, where the Germans, behind dense clouds of poison gas, endeavored to recapture some of the positions lost during the September drive.

Following a laconic report from Berlin that the French had exploded a mine on the Arras-Lille road and won an unimportant engagement but followed to the advantage of the Germans, the French war office tonight in an official communique deals at considerable length with this fighting, which is claimed to have been a success of considerable proportions for the French troops. The German trenches and entanglements on a long front along the highway are reported to have been demolished. French troops quickly occupying the excavations and holding them, despite a hot artillery bombardment and violent counter-attacks by German infantry.

East of Rheims in the Prosno sector, where the crown prince's army sustained a severe battering during September, tonight attacks are reported to have broken down under the French fire, despite the loss of vast clouds of gas upon the French positions.

The French claim to still hold La Courtine, the important trench network on the Meuse salient, which the Germans yesterday reported again in their hands. German night attacks against the trenches won by the French failed, according to a Paris communique.

French troops who yesterday occupied portions of a German trench northeast of Massiges were expelled during the night, according to the German statement.

In Belgium on the British front, east of Ypres and south of La Bassée canal and on separated sectors in the Alsace region, artillery duels are reported.

Thin People Can Increase Weight

Thin men and women who would like to increase their weight with 10 or 15 pounds of healthy "stay there" fat should try eating a little Sargol with their meals for a while and note results. Here is a good test worth trying. First weigh yourself and measure yourself. Then take Sargol—one tablet with every meal—for two weeks. Then weigh and measure again. It isn't a question of how you look or feel or what your friends say and think. The scales and the tape measure will tell their own story and most any thin man or woman can easily add from five to eight pounds in the first fourteen days by following this simple direction. And best of all, the new flesh stays put.

Sargol does not of itself make fat, but mixing with your food, it turns the fats, sugars and starches of what you have eaten into rich, ripe fat producing nourishment for the tissues and blood—prepares it in an easily assimilated form which the blood can readily accept. All this nourishment now passes from your body as waste. But Sargol stops the waste and does it quickly and makes the fat producing contents of the very same meals you are eating now develop into pounds and pounds of healthy flesh between your skin and bones. Sargol is safe, pleasant, efficient and inexpensive. A. R. McIntyre Drug Co. and other leading druggists in Ogden and vicinity sell it in large boxes—forty tablets to a package—on a guarantee as found in each large box. A. R. McIntyre Drug Co., Ogden, Utah. GRAND JURY FOR THE DYNAMITERS

New York, Oct. 27.—Federal grand jury consideration of the cases of the five men charged with conspiracy in plotting to destroy transatlantic ships laden with munitions of war for the allies will begin next month. This was announced today by United States Attorney H. Snowden Marshall after a conference with William J. Flynn, chief of the secret service, and James E. Sullivan, chief of the bureau of investigation.

After reviewing the alleged evidence held by the government against the men, Robert Fay, Walter L. Scholz, Paul Dieck, Dr. Herbert Klenzle and Max Breitung, and giving special attention to the confession of Fay, Mr. Marshall said the government was not convinced that all those implicated had been arrested.

No more warrants have been issued and that for the present, Marshall said, "yet there may be further arrests later. We do not believe that those most responsible for the conspiracy have yet been found. The cases of the men already arrested will go before the November grand jury."

Gas In The Stomach Is Dangerous

A Warning Of Acid Indigestion. Prompt Use Of Magnesia Stops All Sourness And Pain.

Sufferers from indigestion or dyspepsia should remember that the presence of gas in the stomach invariably indicates that the stomach is troubled by excessive acidity.

This acidity causes the food to ferment and the fermenting food in turn gives rise to noxious gases which distend the stomach, hamper the normal functions of vital internal organs, cause acute headaches, interfere with the action of the heart, and charge the blood stream with deadly poisons, which in time must ruin the health. Physicians say that to quickly dispel a dangerous accumulation of wind in the stomach and to stop the food fermentation which creates the gas, the acid in the stomach must be neutralized so good as a teaspoonful of pure bisulphate of magnesia taken in a little water immediately after meals.

This neutralizes the acid, thus stopping fermentation and the formation of gas, and enables the stomach to digest its food with its work under natural conditions. Bisulphate of magnesia is obtainable in powder or tablet form from any druggist, but as there are many different forms of magnesia it is important that the bisulphate which the physician prescribes should be distinctly asked for.

MAJOR GENERALS IN BRITISH ARMY GIVEN PROMOTION

London, Oct. 27, 8:20 p. m.—The following list of major generals in the British army have been made lieutenant generals for distinguished services rendered:

Sir John Stevens Cowans, member of the army council; Sir Archibald James Murray, chief of the imperial staff at army headquarters, London; Sir Charles Carmichael Monro, the new commander on the Gallipoli peninsula; Sir William Robert Robertson, chief of the general staff, and Sir William Riddell Birdwood, who, on the withdrawal of General Ian Hamilton, was placed in temporary command on the Gallipoli peninsula pending the arrival there of General Macdonald.

TONS OF COKE FOR ITALIAN RAILWAYS

Philadelphia, Oct. 27.—Seven thousand tons of coke for the Italian railways are being loaded on the ship steaming for Genoa, which will leave tomorrow for Genoa. This is the first cargo of this product to be shipped in many years and the freight charge will be about three times the cost of the coke. Germany for many years enjoyed a monopoly of the European coke trade.

MRS. A. H. BROWN IS DEAD

Pocatello, Idaho, Oct. 26.—Mrs. H. Brown, an old resident of this city died yesterday morning suddenly. She was the wife of a well known contractor of this place who has resided here for nearly 30 years. Mrs. Brown was born in Pennsylvania in 1852. She is survived by her husband and children, Frank, Frederick, Alvin, Malinda, and Winnie, all grown. Interment will take place Wednesday morning.

NEW YORKER DENIED LANDING PRIVILEGE

London, Oct. 26, 5:46 p. m.—Michael J. O'Connor of New York, a singer on the American line steamer St. Louis, which arrived here from New York on October 24, has been refused permission to land.

The government explained that Mr. O'Connor's nationality, his passport was in question, but it regarded his admission as inadvisable and therefore, according to established rule, excluded him without further detailing its objection.

RECORDS OF THE COMPANY HERE THAT MICHAEL O'CONNOR, WHO HAS REFUSED PERMISSION TO DEBARK AT LONDON, WAS A PASSENGER ON THE STEAMER ST. LOUIS, WHICH ARRIVED HERE FROM NEW YORK ON OCTOBER 24, HAS BEEN REFUSED PERMISSION TO LAND.

NORWEGIAN STEAMER SUNK

London, Oct. 27, 7:35 p. m.—Lloyd announces that the Norwegian steamer Selma of 987 tons net has been sunk. Two members of the crew were picked up. Nineteen others are believed to have been drowned.

BRITISH STEAMER SUNK

Seattle, Wash., Oct. 27.—The British steamship H. C. Henry, which was on a voyage from Seattle to Seattle, was sunk by a German submarine in the Mediterranean sea. The ship was carrying a cargo of mail and passengers. The captain and two crew members were killed. The ship was carrying a cargo of mail and passengers. The captain and two crew members were killed. The ship was carrying a cargo of mail and passengers. The captain and two crew members were killed.

VON BISSING ABSOLVED

London, Oct. 27, 3:15 p. m.—The German government has announced that von Bissing, German governor of Belgium, is formally responsible for the execution of Miss Cavell, according to a statement made today by Lord Robert Cecil, parliamentary under-secretary for foreign affairs. He contended that General von Bissing was not necessarily responsible for the execution.

VIENNA REPORTS GENERAL ADVANCE

Russians, Italians and Serbians Meet Repulse in Battles on Various Fields.

Vienna, Oct. 27, via London, 8:25 a. m.—The Austrian war office issued the following official statement:

"Russian theatre: Southwest of Czortovsk Austro-Hungarian troops repelled several attacks by Russian sharpshooters and captured two officers, 500 men and two machine guns. On both sides of the road to Czortovsk from the northwest, German regiments repulsed the enemy."

"Total Russian losses in this district for the day reached four officers, 1,450 men and 10 machine guns."

"Italian Fighting Less Active."

"Italian theatre: Yesterday's fighting on the Dobro plateau was less active than that of previous days. The severest fighting was involved in the attempts to take our bridgehead positions from Goerz and Tolmino up to Krn. These engagements all ended in complete failures for the enemy. At Krn three Italian attacks collapsed before our fire. The enemy's night attack on Mzlivrh failed. Vigorous artillery fire introduced a fresh attack by strong forces against the Tolmino bridgehead."

"Late in the evening our troops repulsed an attack on the height west of Santa Lucia. Early this morning a second attack against a position north of Kocersko failed with heaviest losses suffered by the enemy in hand to hand fighting. The district of Descla has been under ceaseless fire. A weak Italian attack against Zagora was easily repulsed."

"Serbians Driven Back."
